

Regal Hum 700

Humic acid fertilizer 80%

Formulation: crystalline

Saturation level: 700 grams per liter

HANNANN NAHADE ASIA

SOIL REGENERATION ,
SUSTAINABLE CULTIVATION

Introduction

Regal Hum 700 of HANNANN Company is extracted from the richest and highest quality sources of Leonardite. Leonardite provides a high content of humic acid, fulvic acid and micronutrients that are physiologically active. This product is completely soluble in water and as a natural growth stimulator; it increases the quality of the product and improves the soil structure.

Benefits and Particulars

- Significantly increases the use of mineral fertilizers in the soil.
- Prevents washing or blocking of macro elements (NPK) in the soil.
- Improves soil structure.
- Increases the water holding capacity in the soil.
- Increases soil cation exchange capacity (CEC) and improves soil ventilation conditions.
- Extremely high resistance to hard water
- Stable at low pH
- High degree of saturation
- Can be used in two ways, foliar spraying and irrigation fertilizer
- High compatibility with NPK fertilizers

Element	Percent
Potassium soluble in water	10
Total Humic materials	80
Humic Acid	65
Fulvic Acid	15

Solubility: 100%

Product	Method of Use	Amount of Use
Garden	Water irrigation	1-1.5 Kg in hectare
	Foliar Spraying	0.5-1 Kg in 1000 Liter of water
Agricultural	Water irrigation	1-1.5 Kg in hectare
	Foliar Spraying	1-2 Kg in 1000 Liter of water
Seeds	Seed Of Property	0.5-1 Kg in each 100 Kg of seed

Notes:

- Avoid mixing with very acidic and alkaline compounds.
- Spraying should be done early in the morning or at sunset.
- In case of mixing with other compounds and poisons, it should be tested first in a small amount and at a limited level.
