

Super Hum 100

Humic acid fertilizer 75%

Formulation: crystalline

Saturation level: 150 grams per liter

HANNANN NAHADE ASIA

SOIL REGENERATION ,
SUSTAINABLE CULTIVATION

Introduction

Super Hum 100 of HANNANN Company is extracted from the richest and highest quality sources of Leonardite. Leonardite provides a high content of humic acid, fulvic acid and micronutrient elements that are physiologically active. This product is completely soluble in water and as a natural growth stimulator; it increases the quality of the product and improves the soil structure.

Benefits and Particulars

- Significantly increases the use of mineral fertilizers in the soil. It prevents washing or blocking of macro elements (NPK) in the soil.
- Improves soil structure.
- Increases the water holding capacity in the soil.
- Increases soil cation exchange capacity (CEC) and improves soil ventilation.
- Increases the activity of beneficial soil microorganisms.
- Reduces the amount of soil pollutants.
- Increases the process of photosynthesis in plants.
- Increases quantitative and qualitative performance in products.

High compatibility with NPK fertilizers -

Element	Percent
Potassium soluble in water	10
Humic Acid	70
Fulvic Acid	5

Product	Method of Use	Amount of Use
Garden	Water irrigation	3-4 Kg in hectare
	Foliar Spraying	20-30 Kg for each tree
Agricultural	Water irrigation	2-3 Kg in hectare
	Foliar Spraying	5-10 Kg in hectare
Seeds	Seed of property	0.75-1 Kg in each 100 Kg of seed

Notes:

- Avoid mixing with very acidic and alkaline compounds.
- Spraying should be done early in the morning or at sunset.
- In case of mixing with other compounds and poisons, it should be tested first in a small amount and at a limited level.
